

# 2mm and 3mm Break-Out Kits for Fiber Optic Cable

## Description

The Light Connection's 2mm and 3mm Break-Out Kits are used for the quick and simple termination of 900µm tight buffer distribution cables. TIA/EIA color coded furcation tubing allows for the easy identification of the tight buffered fibers and the new and improved inner tubes provide excellent protection against kinking when terminating.

## Break-Out Kit

## SPECIFICATIONS

<i>Dimensions</i>		<i>Part Number</i>
